

New. Better. Lower prices.

HINGE

Stainless steel version for plate changing device

- Your current hinges have a sealing tape made of rubber, which quickly ages and becomes porous. Damaged sealing tape can destroy your printing plates and can cause production downtime.
- With our newly developed and improved hinges you prevent this!
Now available at MARKET-X.

New development of the hinges

For manroland Goss commercial web presses.

Installation location: plate changing device in the printing unit aggregate.

Compared to the previous version, the hinge is made entirely of stainless steel.

With the right care, this gives you numerous advantages. You will find the care instructions on page 2.

Better quality. Same price.

Benefits

- Easy & fast assembly
- Easier cleaning
- No corrosion
- Low storage costs
- Longer life & higher product quality
- Better protection against contamination
- Unbeatable price-performance ratio

Do you see potential for improvement? We improve spare parts according to your wishes!

Customized. In quality. Price-wise.

Care instructions

Step 1: Assembly of the new hinges

Step 2: Apply a thin layer of suitable assembly grease with a standard flat brush.

Important: The assembly grease must be reapplied after each cleaning.

The assembly grease facilitates cleaning, protects against sticking, resists washout, seals and lubricates the hinge.

The required assembly grease corresponds to the following material numbers depending on the container:

- 09.15090-0104 (1 liter container)
- 09.15090-0105 (10 liter container)
- 09.15090-0106 (30 liter container)
