

New. Better. Lower prices.

## Upgrade clamping bracket for magnetic brake

- With the existing clamping brackets, we have a tendency to lashes and dog ears due to shape and distance to the folder table.
- You can prevent this with our improved clamping brackets for magnetic brakes!
- **Now available on request from your personal contact.**

### Optimized clamps

For manroland Goss commercial web presses.  
(Lithoman/Rotoman)

Installation location: Folder magnetic brake

Thanks to their geometry, the improved brackets reduce the lashing of the belts and thus improve belt- and product guidance during the folding process.

The part number 70.00016-6423 is a set consisting of 8 clamping brackets and 16 screws.

(Installation location: spring metal plate clamping before limit travel stop/head stop)

**new**  
**70.00016-6423**

### Benefits

- Better belt and copy guidance during the folding process
- Higher folding quality
- Lower tendency to lashes and dog ears
- Protects spring metal plates from damage

### Better quality. Attractive price.

Do you see potential for improvement? We improve spare parts according to your wishes!

**Customized. In quality. Price-wise.**
